

Environmental Policy Statement

Reassurance Security Services are committed to preventing pollution where we can by setting objectives and targets to continually improve our environmental performance.

We recognise that through our activities and services we have the potential to have an impact on the environment; consequently, we seek to minimise or prevent any harmful environmental effects that result from our activities.

We are also committed to delivering a quality of service to all our clients and as a part of this process the management of our environmental aspects is as important as the management of all other areas of the business.

Our commitments are to:

- Train staff to ensure they are aware of their environmental responsibilities and their role in working towards a better environment.
- Comply with all applicable environmental legislation and other appropriate requirements.
- Minimise the use of natural resources.
- Improving energy efficiency by using less energy in our operation.
- By introducing a system of re-use rather than disposal and the promotion of recycling.
- Using appropriate waste management systems, thus reducing the waste going to landfill.
- Minimise nuisances that may arise from our activities.

This policy is available to the General Public as well as being communicated to our workforce, contractors and clients.
