EXPERIENCE

Jib Operator: I have experience as a jib operator in a range of production environments, from being directed for live TV to providing general shots for documentaries and short films. Being an owner & operator also means I'm directly involved in constructing & deconstructing the jib.

Camera Operator: I've owned and used various cameras throughout the past few years, from Mini DV to ENG style and more recently, digital cinema cameras. I like to think that I have a good understanding of framing, focal lengths & exposure. I've found that using a limited number of lenses on my RED One MX in the past few years, sometimes just two, has really made me concentrate on framing and camera position. I also have experience with basic lighting setups, including aspects such as hard and soft light, colour temperature etc.

Editor: My largest edited project to date that has been released was '*Gabriel Cushing Versus The Zombie Vampires*' which was shot in 2011 and edited by myself in FCP 7. Since then I've edited various short projects in FCP X. I like to think I have a good understanding of the technical aspects, such as file formats etc.

ATTRIBUTES

In technical & creative terms, I like to think that I have a good eye for detail. Even whilst enjoying, for example, a live entertainment TV show, an incorrectly 'racked' camera can still catch my eye. Equally I enjoy and appreciate good direction & often take what I observe onboard as inspiration. On set I see my role, as a camera or jib operator, to help the director (or DP) create their vision, whilst adding my own input & using initiative where appropriate.

CREDITS
