## Personal Statement

I am an enthusiastic individual who is well organised, creative and confident. After completing my degree in Experimental Film Production at Staffordshire University with a 2.1, I have continued to work freelance as an Art department assistant and videographer, whilst also working for a wedding photography company as their videographer and editor. Whilst working on short films post graduation, I have been able to advance my communication skills and my ability to thoroughly follow direction, get the most out of a team of people I am leading and taking on board instruction from peers. I am self disciplined and a lateral thinker who enjoys using my initiative to solve problems, I work well under pressure and thrive in environments that require me to be consistently on the ball.

---
