Other Stuff

My work on Sky Studios 'The Rising,' BBC 1's 'Casualty' and 'Silent Witness' and on comedy/horror feature film 'Two Heads Creek' all involved a substantial amount of VFX work.

A particular area of interest to me are the many advances we are seeing which are going to change the way we make visual content. For example, Wonder Dynamics and Unreal Engine's tools for making films effortlessly with CGI; Suno's ability to create sound tracks and Sora's text and speech to video, are just three examples of the production revolution in film, TV and commercials.

Virtual Production also has its place and I used this to create the opening scenes of a 'Silent Witness' episode shown earlier this year.
