Previous employment

Blackmagic Design

I was previously employed by Blackmagic Design, Where I produced marketing videos for them using their latest camera and broadcast equipment as well as a variety of software packages including:

- Avid Media Composer 7
- Adobe Premiere CC 2015
- Adobe After Effects CC 2015
- Adobe Photoshop CC 2015
- DaVinci Resolve 11
- Final Cut Pro X

Alongside the camera and editing side of the video production I also had to deal with a wide range of administrative tasks to ensure the studio I managed was ready to be operational at a moment's notice, this involved ensuring any relevant equipment that was not a permanent studio asset was signed out of stock properly and returned upon completion of the shoot on time. As well as ensuring the all relevant crew were on set when required which often had to be arranged internationally with the presenters as they were travelling at trade events.

Current Employment

I am currently a self-employed film maker, and have worked for a number of different clients on a wide variety of projects including but not limited to:

Short and Feature films

Retribution - Second Assistant Director

Radio Friendly – Gaffer

Family Values – Sound Recordist

Quince – Camera Operator/Editor

The Prevailing Winds - DIT

TV Series

Outings (To be released summer 2016) – Lighting Director

Other

I have also worked on a great number of commercial projects for local business, Music videos for Manchester based bands and several weddings and other events.

I am also a current employee on a Freelance basis of the Futureworks School of media where I teach on their TV and Film Production course.
