Personal Career Focus

For as long as I can remember I am intrigued and excited by what you can create from start to finish working with a team of creative like-minded professionals who all have that passion for producing something amazing collectively.

I will continue to educate myself throughout my employment by taking courses taught by the best, so I can grow and improve my skills and talent. You can never stop learning but ultimately being hands on, on a real set with working professionals, is the best teaching you can receive and this is something I am looking to do.

I am taking positive steps forward to advance my career and I am ready to bring everything I have to my role including a positive, professional can do attitude. I will do my best to be a real asset to your team whilst learning everything I can from my peers. I would really love the chance to be considered and prove to you that I am a positive addition.
