Key Skills

With 10 years experience as a prop and model maker I am a good all rounder. Having moved back to Yorkshire after living in London I am keen to build a new network and relationships in the area. Proficient at moulding and casting, sculpting, carpentry, painting and aging, metal work and some very basic electronic skills. I also have decent experience as a poly carver having worked on several large-scale projects, both in a team and solo. I have my own studio based in Sheffield so can work from there or travel.

Education

BA (Hons) Technical Effects for Performance from the London College of Fashion
Currently working toward becoming a coded welder.
