## Profile

I am an endlessly enthusiastic Graphic Designer for Film and Television. Working on fun and exciting shows has helped me develop a wide knowledge in many formats of graphic design, I profess to be unique and original because I have been given the freedom to invent and expand my creativity.

Having a great interest in the craft of graphics has encouraged me to explore and invent new ways to produce all of my work "in-house" keeping the look of each show individual and bespoke. The Art Department has been a great passion of mine since I was a child and it is constantly a privilege and a joy to be able to create and learn in this industry every day.
