## Professional Profile

After Graduating from my Creative Film and TV Course with a First, it sparked my interest even more to have a career in the Film Industry. Throughout my time at the University, I have worked on a variety of Student Films and have even won awards for them, from Best Film in a 72-hour Film Competition to Official Selections in Film Festivals, to which I am continuing to volunteer on other productions. Although my work background is limited, I have gained plenty of experience in how the industry works after speaking to people within the industry at networking events and through my lectures.
