

Stefan Hössle

PROFILE

Passionate adventurer with a First Class Honours degree in Geography from Swansea University, specialising in adventure filmmaking. From working with brands such as Monster and RedBull, to live broadcasts like the Women's Rugby Six Nations, my work reflects a blend of technical prowess and creative finesse. Proficient in DaVinci Resolve, Premiere Pro, and Adobe Creative Suite, I excel in graphic design and photography. Extensive experience on set working for large production companies such as Mighty Sky, Upper Cut and Evenlode on high-budget productions with the BBC, Netflix and Amazon. With certifications in CAA CofC and GVC, I navigate both high-end cameras and drones with ease. Let's elevate projects together with my energy and expertise.

SKILLS

- Advanced proficiency in videography, drone piloting (holding CAA CofC + GVC), and editing, honed through extensive experience with industry-leading production companies such as Mighty Sky and Evenlode Films.
- Skilfully managed diverse projects, including live broadcast coverage of high-profile events like the Women's Six Nations at Cardiff Stadium, demonstrating exceptional organisational abilities and clear communication within fast-paced team environments.
- Adept in utilising advanced post-production tools such as DaVinci Resolve, After Effects, Premiere Pro, Photoshop, Illustrator, and Lightroom to achieve stunning visual effects.
- Demonstrated expertise in operating a wide array of high-end cameras including the Blackmagic Pocket 6K Pro, Sony A7Sii, RED Komodo, Lumix GH5s, and Lumix S5, showcasing versatility and adaptability across various camera platforms.
- Proficient in focus pulling and camera operation from tracking vehicles including buggies, drones, and cars, ensuring seamless and professional footage capture in dynamic settings. Particularly experienced on the DJI Inspire 3 as both a pilot and camera operator.
- Certified by the CAA for both CofC and GVC, enabling commercial drone operations with proficiency in FPV and commercial drones such as the DJI Inspire 3 and Alta X, pioneering the integration of aerial cinematography into filmmaking.
- Extensive experience in shooting mountain biking and collaborating with prominent industry players such as Cyclists Fighting Cancer and Leisure Lakes Bikes, leveraging insights into extreme sports to deliver captivating and immersive visual narratives.
- Demonstrated technical prowess extends to filming at heights, acquired through rigorous rope videography courses for mountaineering, ensuring safety and precision in capturing breathtaking aerial footage.

EDUCATION

Swansea University — Geography BSc, First Class Honours, 2023 Sir Dudley Stamp Prizewinner best Geography Dissertation - Wilfires aerial grammety.
