ABOUT ME

I recently got my first credit as a grip trainee on the second season of the BBC series 'Boarders' gaining valuable hands on experience with various types of equipment as well as learning key set etiquette skills. I excel in social settings having brilliant interpersonal abilities and a natural creative mindset. I'm adaptable and responsible, with high levels of motivation and forward planning skills. Throughout my past three years at university I used the DJI Ronin 2 paired with the Arri Alexa Mini and Sony FX6, refining my technical knowledge and visual storytelling skills. I'm actively seeking trainee grip roles in all genres of Film and Television in the Bristol and surrounding areas, eager to learn the art and disciplines of the grip department.

FREELANCE
