

ABY LAREN OLDFIELD

PROSTHETICS, HAIR, AND MAKE-UP TRAINEE

PROFILE

Starting out in a theatre setting, throughout college I leaned more towards makeup and developed an interest in prosthetics which lead me down the path to my degree and current work. I love applying makeup along with creating prosthetics in a workshop, particularly mould making and casting, and have an interest in the digital side of things with varying levels of experience in CAD, modelling, and digital sculpting softwares. I'm currently looking to expand my hair styling skillset and gain more on set and workshop experience.
