ABOUT ME

Focusing on sound recording for productions has taught me how to express myself creatively within my work, and provided me with a new found passion for the artistry of capturing sound. Because of this, I have been a part of projects that have encompassed many different areas of Sound Recording, from location sound for Film and TV, to recording sound for live bands and Music. As a result of this, I have had the pleasure of being a part of large and small crews, as working with others is a huge driving factor in what makes me enjoy working in productions. In my spare time, I enjoy making my own short films, DJ'ing and collecting records.

SKILLS

- Experience within multiple production departments
- Experience using Industry standard recording devices (633 mixers, radio mics, boom mics)
