## PROFILE

---

I am a recent graduate from Leeds Trinity University in Film Studies, and I am extremely enthusiastic in starting a career in the media sector. I work efficiently in a team, as evidenced in my work experience with the ITV Content Delivery Department. I also thrive in a professional work environment as seen with my current job as a Camera Technician for Built Environment Networking. I am an individual with a strong imagination, and I excel at releasing spontaneous bursts of creativity. I am currently searching actively for runner work as I wish to work hard in order to progress in the industry to a 3<sup>rd</sup> AD. I also love documentaries having created my own feature length project in Rwanda.

## TECHNICAL INDUSTRY SKILLS

---

- **Knowledge of software** - I am able to use editing software such as Adobe Premiere and Adobe Audition to a high standard.
- **Camera operation skills** – I have extensive experience using video cameras and I know which shots are effective when trying to create an emotional response.
- **Directing experience** – During my time at Leeds Trinity University I've had many opportunities to direct short films and learnt how to effectively organise a set and put a project together from conception to execution.
- **Experience in runner work**– I have done runner work for a professional photoshoot, as well as production & floor running for a Moonage Pictures work placement.
