PERSONAL STATEMENT

I am both a reliable and dedicated London-based camera trainee. I have worked on a variety of sets, making me well acquainted with set etiquette. I view every job as a learning curve, and I always treat them with professionalism. I have years of experience working with digital formats, and most recently, I have started experimenting with analogue. I am very open to developing my skills further and truly learning the ins and outs of the camera department but most importantly, I can make a fantastic cup of tea.
