KNOWLEDGE AND EXPERIENCE

As a Director of my own business, I have successfully brought my skills and background working in Film, Television and Forensics together to form a unique business that allows me to be an Expert Witness, working in Forensics and Cinematographer, working in Film. For my forensic side of the business, I have worked for many legal firms, the General Medical Council and National Security Agencies. For my film side of the business, I have worked for Universal Pictures, Warner Brothers, Department of Transport, BBC, ITV and on many commercial films.

Tony, my colleague built Flyka and I have taken it further with new technology available. The tracking vehicle can do just under 30 miles per hour, is fume free, silent and modular to fit your production need.
