Cinematography	Basic Graphic Design
DaVinci Resolve	Adobe Premier Pro, After Effects and Photoshop
Collaboration & Communication	Highly Organised
Analytical	Excellent Communication
Leadership	Teamwork
Tenacity	Dedication
Microsoft Office (Word, Excel, PowerPoint)	

Education

Bournemouth University

- **Film, BA (Hons) / 2020-2023 / 2:1**
- I developed strong editing skills across various genres and gained hands-on experience with different cameras and shoot setups. Working on group projects and presenting to peers strengthened my teamwork and communication skills. These experiences have made me adaptable and confident in creative and collaborative environments.

3 A-Levels in History, Film Studies and Physical Education from Maidstone Grammar School.

Projects

Is CGI Overused in Modern Action/ Adventure Films?

- Graduate Project
- Type: Video Essay
- Role: **Multiple (Solo Project)**
- Software Used: **Adobe Premier Pro, Adobe Photoshop**
- A video essay created for my graduate project in my final year at university. I worked on this project alone and analysed how the overuse of CGI in modern action/ adventure films has had a negative impact on audience engagement.

Fall (Music Video) – Dan Mercer, Beau Jackson

- Type: Music Video
- Role: **Editor**
- Software Used: **DaVinci Resolve**
- A music video aimed at showcasing the dancer's individual skill while simultaneously working as a music video in its own right. I was the sole editor on this project and was also responsible for creating the thumbnail.

Is It Worth It?

- University Project
- Type: Observational Documentary
- Role: **Editor, Graphic Designer, Camera Operator**
- Software Used: **Adobe Premier Pro, Adobe Photoshop**
- An observational documentary created in my second year of university. Follows an aspiring bodybuilder, Sam, inside and outside the gym. Through short interviews with Sam and following him through daily life, the documentary attempts to answer the question, is it all worth it?

Identities

- University Project
- Type: Short Film
- Role: **Cinematographer and Sound Engineer, Graphic Designer**
- Software Used: **Adobe Photoshop**
- A thriller short film that follows a detective as he tries to unearth the truth behind a grisly murder with the prime suspect suffering from a split-personality disorder. I was the sole cinematographer and sound engineer and was also responsible for creating the films poster.

Work History

JD Wetherspoons

- Sittingbourne and Maidstone
- 2023 – August 2025
- Chef

- Working in a high-pressure, time-critical environment as part of a team, regularly as a shift leader.

- Sales Assistant / Part-time University Work

Amazon

- Aylesford
- August 2022 – September 2022
- Night Shift Warehouse Operative / Part-time University Work

Passions and Interests

I'm passionate about bodybuilding and martial arts, which have both given me a strong discipline to reach personal goals and resilience to keep pushing forward when things get tough. Having competed in martial arts events and tournaments as well as maintaining a consistent training routine, I've strengthened my dedication, work-ethic and ability to overcome difficult hurdles presented to me. These qualities I apply to my personal growth as well as my professional development.

Independently built a PC from scratch without any prior experience with PC building. I had to research all the different parts to understand exactly what I needed, as well as learning how all the components fit together. This process taught me not just how to build a PC, but how all knowledge I don't currently have can be learned with hard work and a positive attitude to learning, something which I take with me whenever I try new things recreationally or professionally. This process demonstrates my ability to learn new skills, understand new concepts, execute tasks with perfect accuracy, and my strong drive to achieve.

I'm very enthusiastic about the world of film and television, with a keen interest in storytelling, visual trends and industry developments. In my spare time I actively develop my creative and technical skills by teaching myself editing techniques on Adobe and DaVinci software, continually improving my content creation and editing skills.
