

Kacper Wozniak

Photographer, Videographer, Drone Operator

Growing up I've always been interested in outdoor sports and adventure. In my youth I was really passionate about mountain biking and loved competing in downhill events. Later, I dove deep into the water-sports world and for several years I was a professional windsurfer, traveling and racing around Europe. This taught me about the importance of consistency, organisation and self-discipline. For a while that was my main focus, and in the background I also worked as a videographer, photographer and windsurfing instructor.

Five years ago, I decided to shift my focus and fully commit to a career in content creation. Since then I've gone full-time into videography and photography, working as a freelancer and also as a member of a media company - TRIO Stories. I've been involved in various types of projects, ranging from working with athletes and covering sport events, to working on commercial sets with 15+ crew for companies such as Xiaomi, Amazfit and Ecoflow.

I am reliable and very meticulous, with experience in videography, photography, drone operating, editing, online marketing and more. My strengths lie in attention to fine detail and producing very high quality content. I'm happy to provide a visual portfolio of some of my work from the past few years.
