I am a reliable, hardworking and extremely professional individual with ambitions to continuously further myself within the make up industry and a constant desire to always deliver the absolute best result for the client. As a makeup artist and session stylist with 11+ years experience within the industry, working in television, film and fashion, I pride myself in having an exceptional ability to adapt to any environment and meet every brief to the highest standard. An extremely hard worker, with a great attention to detail, who has drive and ambition yet remains focussed on all tasks given, I will always use my initiative to add value to the projects I work on and have the ability to think on my feet. I work well to both detailed and rough briefs, bringing a creative edge to every task at hand if necessary. With a history of working with both large and small crews, I have been able to develop excellent communication skills and consistently work with the upmost care, enthusiasm and motivation. I am a fantastic team worker, who has experience in managing and developing looks for a team of makeup artists as well as assisting. These notable strengths have provided me with the confidence to also work individually in an organised, calm and patient manner within high pressure situations. These attributes have often led to reoccurring work with various clients for many, many years.

KEY SKILLS

Make up application to an extremely high standard (natural-full), basic SFX skills, skilled with all aspects of hair styling including wig application and hair extensions.
