
PROFILE

Producer / Assistant Director / Production Specialist.

With over 14 years of professional experience, I have built, run and maintained sets to the highest standards as Head of Production, Producer and Assistant Director. Since 2009, I have developed a wide range of skills and the ability to wear multiple hats while staying focused on the end goal.

My leadership style is centered on trust and collaboration, ensuring that my crew is always professional, candid, and mindful of the client's needs. I value honesty and prioritize building strong relationships based on integrity and authenticity to create an exceptional experience in a fast-paced environment.

I have spent the majority of my career in America and I am eager to bring my skills and experience to productions based in the United Kingdom. As someone who is deeply passionate about production, I'm constantly seeking out new and exciting opportunities to develop my skills and take on fresh challenges.

Throughout my career, I have successfully worked with a diverse array of dynamic elements on set, such as children, animals, vehicles, motion-control robots, slow motion, practical SFX, stunts, and virtual production. I have worked on both studio and location-based productions and consistently delivered results to the highest quality.
