

# Ella May Limehouse

## 👤 Profile

I am a dedicated model maker with a keen eye for detail and individuality; a skilled leader who also works well as part of a team, proven by my work as trainee sculptor in Greens Team at Leavesden Studios. I work hard to maintain a clean and tidy workplace and treat my colleges with respect and kindness. My sculpting and finishing abilities are my greatest strength with a unique ability to create personality and life in my work (winning two awards at NewBlades 2025). As well as characters I find myself drawn to organic forms, shapes and textures, and try to incorporate them into my sculpts and decoration in any way possible be it by transferring fur, sculpting texture or weathering/ageing with paint. I am also skilled in moulding and casting, having worked with plaster, jesmonite, silicone, foam latex, fast cast resin and fibreglass. I have made a multitude of moulds between 1 and 6 parts as well as life casting the face for a face prosthetic.
