PERSONAL PROFILE

Hello there, thanks for taking a look at my CV! A Birmingham based Graphic Designer, I have 15 years of experience in a range of design work. I am proud to have been part of a number of successful teams involved in multi-million pound construction and goal smashing crowd-funding bids.

My move to Graphic Prop and Production Design, served to take on more creative, varied work. Ensuring period, situational and construction accuracy in my work is an aspect I am most passionate about. I love nothing more than trawling my collection of reference materials and researching items for prop creation.

Considering cast, crew and viewer in my work is also important. How work will be received both in person and on screen, is always considered, whilst keeping within budget and time scope is vital.

I relish the immense amount of hard work, dedication and attention to detail involved in this work. One thing my experience in corporate environments has taught me is resilience and empathy during the most challenging of times. I am ready to jump into a team and give my all to help bring stories to life!
