Are you tired of playing C.V. Top Trumps when looking for a new Employee; Well look no further. Not only can I alter or fix any building this side of Dubai. I also have the skills to pay the bills when it comes to design. Not only do I have good design skills but I also am an expert maker. I have built many sets and stages including reassembling the set for 'Wire In The Blood'. I love this aspect of design so much, I am designing my own CNC Gantry Router to carve out my creations in aluminum, plastic and wood!
