I've also worked on many film and design projects in addition to those listed... since I entered the industry in 1995. My experience has spanned all levels of the art department from assisting to designing... I am therefore used to adapting to different sized departments, budgets and responsibilities. I have a broad base of practical skills from scenic painting, draughting, propmaking, animation etc through to graphic design.

Other work includes designing for events, theatre, and stills photo shoots.

I also work as a part time associate lecturer in Production Design on the Film and Media Production course at Hallam University.
