

We would like to introduce our company.

We are Studio Cars, based at our offices in the Bottle Yard Studios, Bristol

We would very much like to be allowed to tender for your forthcoming production.

Studio Cars provides a full service uniquely to the film and television industry, we do not get involved with the general public.

We are specifically geared up to handle small or large productions and have a reputation for keeping costs down, offering unique flexibility during shooting and planning travel to be as ecologically sound as possible.

We have an in-depth knowledge of the South West and its transport problems. Our pool of 18 drivers are fully experienced in Film and Tv unit/artist transport and each Production is allocated with an experienced driver to act as Transport Captain where needed, allowing your 2nd AD to get on with the real business of Film and Tv.

In 2014 we provided unit cars for ABC's Galavant pilot and series, Sky's Trollied, BBC's Poldark and Dr Who, ITV's Broadchurch among others.

So far in 2015, we have provided cars to Dr Who, Sherlock, Bastard Executioner, Eddie the Eagle, Channel 4's new game show - Time Crashers, Bristol Green Capital

launch, Screenology Bristol, The Last Kingdom, and supplied cars to Pinewood as dailies.

*Our Ecology Pledge -*

*We are Studio Cars Bristol Limited, with our new offices in The Bottle Yard Studios, Whitchurch providing Artist and Unit Transport to the Film and TV industry in the South West.*

*We are currently restructuring to include service to the wider Bristol Media market, including an in-depth look into the carbon emissions of our vehicles.*

*2015 will see us investing in EREV/PHEV for use in the City of Bristol and the surrounding areas. We are currently in talks with a number of major vehicle manufacturers regarding acquisition of low emission vehicles.*

*Using electric and low emission extended range vehicles means our CO2 emissions will be dramatically reduced in the City, allowing us still, to service the longer journeys required in our industry with the same fleet. We are currently running Executive vehicles with a range of eco options fitted, including Bio - Diesel, and Retuned/Chipped Eco Diesels and LPG.*

*As Bristol is a centre of excellence in the UK for Film and TV production, we believe our use of these alternatively propelled vehicles will greatly benefit the environment within the City of Bristol.*

*A large part of our company ethos is also to reduce unnecessary journeys, through*

*strategic production planning, again helping to reduce carbon emissions within the City.*

*As we move forward through 2015, Studio Cars will be investigating in new and radical technology to consistently improve our service and reduce our carbon footprint and impact on the environment.*

References can be obtained from these productions as to our operational capabilities.

Please see our website for further details of our experience, testimonials and services.
