Personal Statement:

Editing is less of a career choice for me, more of a lifestyle. From the age of 11, digital film and video editing is all i have ever wanted to do. I have never had another career option in mind. From an even earlier age i have been fascinated by all things film and television. Nothing gives me more pleasure or fulfilment than creating a video and then realising that the video has inspired emotion in people. Making other human beings feel strong emotions because of a video i have created is what matters to me.
