## Interests

I spend most weekends and time out of college working with a small film crew, we come up with ideas, write, shoot and edit short films, I also have a very strong passion for art and animation and tend to do my own stop-motion and art projects, I work in sculpting, drawing and graffiti art . I am also very passionate about photography, I spend a lot of time taking and editing photographs, mostly contemporary and abstract, working in themes of mostly Architecture or Street photography. apart from film, I enjoy travelling around the UK, I like exploring places I've never been before and finding creative and unique places that aren't commonly known, I spend every weekend in and around Sheffield filming/photographing/exploring because I love it's creative and cultural atmosphere, even compared with places I have visited far away.
